PROFILE SUMMARY

Full Stack Engineer with experience building and improving products across backend, web, and user-facing workflows. Growing within the fast-moving environment at Digital Qatalyst has sharpened both my technical range and the way I solve problems with ownership and adaptability. This experience has taught me to turn changing requirements into clean, practical solutions and to build quickly without compromising maintainability, scalability, or user experience.

CORE COMPETENCIES

- Backend API Development
- Full-Stack Product Development
- Scalable System Design
- Authentication & RBAC
- SQL & NoSQL Databases
- AI/LLM Integrations
- Performance Optimization
- Agile & Startup Collaboration

WORK EXPERIENCE

Digital Qatalyst, *Fullstack developer*

April 2024 – present

- Contributed to the Khalifa Fund Community Module, delivering features across messaging, activity feeds, analytics, and moderation, while balancing rapid iteration with reusable implementation patterns that supported reliable engagement workflows and sustainable feature growth.
- Worked on Wellness 4.0, a service marketplace platform with service discovery, booking, ratings and reviews, and RBAC, helping shape permission-aware workflows and user experiences that could be shipped quickly, maintained easily, and extended as product needs evolved.
- Supported development of DTMP, a design- and blueprint-oriented platform for organizations, by implementing rate limiting, API safeguards, and workflow performance optimizations, helping improve reliability and create a stronger foundation for scale.

EDUCATION

KCA University

May 2018 – Nov 2021

- Bachelor of Science in Information Technology (BSc IT)
- Relevant Coursework: Web Development, Data Structures and Algorithms, Database Management

TECHNICAL SKILLS

- **Back-End:** ExpressJs, Supabase, WordPress CMS
- **Front-End:** React, NextJs, Javascript, Tailwind, HTML, CSS
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud Platforms:** Azure
- **Tools:** Git, Docker
